“See the difference stainless steel makes in storage”

S.S SELECTIVE PALLET RACKING

Stainless steel selective pallet racking is a storage system comprising upright frames and horizontal beams made of stainless steel. It allows for individual access to each pallet, making it highly efficient for various storage applications.

Benefits and Advantages

1. Durability

Stainless steel offers exceptional resistance to corrosion, making it ideal for environments with high humidity, temperature fluctuations, or exposure to chemicals.

2. Hygiene

The non-porous surface of stainless steel is easy to clean and sanitize, crucial for industries handling food, pharmaceuticals, and chemicals.

3. Strength

Stainless steel offers high load-bearing capacity, ensuring safe storage of heavy loads.

4. Flexibility

The system can be configured to suit various warehouse layouts and storage requirements.

5. Efficiency

Direct access to each pallet optimizes picking and put-away processes.

Salient Features

- Constructed from high-quality stainless steel
- Adjustable beam levels to accommodate different pallet sizes
- Robust and sturdy design for heavy loads
- Easy installation and reconfiguration
- Wide range of accessories available (e.g., pallet stops, wire mesh decking)
- Compliance with safety standards
