

RELIABLE

STORAGE SYSTEMS

Compactors

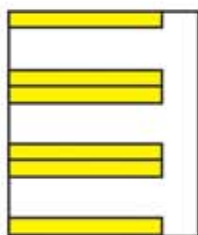

**The Latest Innovation In
Space Utilization Industry.**

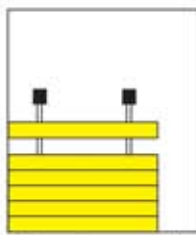

The Mobile Racks offered by us help to recover lost floor space. These provide storage capacity with security. We can configure these racks for any type of storage. These are manually operated (Push & Pull type) and mechanically assisted (Chain driven system) and the clients can avail either of these in accordance with their requirements.

Features

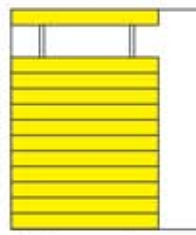

- The Special antifriction bearing make it easy for anyone to operate.
- All materials are made of prime quality CRCA conforming to IS 513 grade for a longer life, these are passed through a 7-tank pretreatment process before being sprayed Alkyd-amino paints for a long scratch resistance finish.
- All trolleys are manufactured with hot rolled steel and fitted with precision engineered shaft and antifriction bearing for extremely smooth operation.

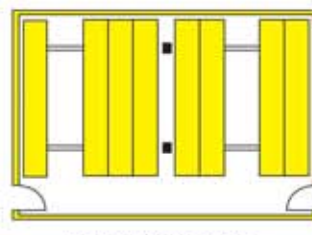

Fixed storage

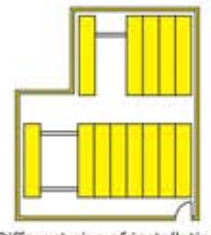

Same storage with 50% space saved.

50% more storage in same space.

Two independent mobile installation.

Different size of installation used for irregular rooms.

The Salient features of the system are :-

- ◆ Provides Maximum storage capacity by eliminating need for more than one passage.
- ◆ Storage units can be flushed together & locked at one end of total security.
- ◆ Insurance protection from dust.
- ◆ Very safe & easy manual operation.
- ◆ Requires almost no maintenance.
- ◆ Tailor made design to required load capacity & type of goods.
- ◆ Can carry adjustable shelving racks, bins, cupboards, cabinets or any type of storage unit.
- ◆ Decent appearance, painted or powder coated to colour shade of customer's choice.
